## For Forest Planting

State Forester Secret, of Ohio, says: "For forest planting, hickories, walnuts, and oaks can be grown in plantations, by planting the nuts directly where the trees are to stand. It is difficult to transplant hickory, because of its long tap root, consequently the nut should be planted in the fall in permanent location. As a rule the nuts should be planted at least two or three times as thick as the trees are to stand to make up for losses in germination. Nuts planted from 2 to 4 feet apart is not too thick for a forest."

The Michigan Agricultural College, East Lansing, will erect four additional greenhouses, three to be used for horticultural experiments, while the other one will be at the disposal of the soils, botany and farm crops departments.

At the 49th annual meeting of the Iowa Horticultural Society in Waterloo, Ia., Nov. 13-14, the addresses included "Varieties of Fruit for Iowa," by H. L. Lantz, Ames; "Saving the Nut Heritage," by S. W. Snyder, Center Point. Earl Ferris, Hampton, and E. M. Sherman, Charles City, are on the board of trustees.

During the last twenty years the Government Nursery in Hawaii has grown and distributed nearly 5,000,000 trees which have been planted out in Honolulu and in the surrounding country.

## For Forest Planting

State Forester Secret, of Ohio, says: "For forest planting, hickories, walnuts, and oaks can be grown in plantations, by planting the nuts directly where the trees are to stand. It is difficult to transplant hickory, because of its long tap root, consequently the nut should be planted in the fall in permanent location. As a rule the nuts should be planted at least two or three times as thick as the trees are to stand to make up for losses in germination. Nuts planted from 2 to 4 feet apart is not too thick for a forest."

The Michigan Agricultural College, East Lansing, will erect four additional greenhouses, three to be used for horticultural experiments, while the other one will be at the disposal of the soils, botany and farm crops departments.

At the 49th annual meeting of the Iowa Horticultural Society in Waterloo, Ia., Nov. 13-14, the addresses included "Varieties of Fruit for Iowa," by H. L. Lantz, Ames; "Saving the Nut Heritage," by S. W. Snyder, Center Point. Earl Ferris, Hampton, and E. M. Sherman, Charles City, are on the board of trustees.

During the last twenty years the Government Nursery in Hawaii has grown and distributed nearly 5,000,000 trees which have been planted out in Honolulu and in the surrounding country.
